

Privacy Policy for Fortune Cookies for Jira

Last Updated: Feb 17, 2025

Introduction

Welcome to "Fortune Cookies for Jira" ("the App"). This privacy policy describes how we handle data in compliance with the General Data Protection Regulation (GDPR) applicable in the European Union (EU) and relevant data protection laws in the United States (e.g., CCPA).

Data Collection and Processing

The App does not store or process any personal data. The only information that is collected and processed is the following project data from Jira:

- Jira Project Key
- Jira Project Type (e.g., "software", "business", etc.)
- Jira Issue Type Names (e.g., "task", "bug", "story", etc.)
- Jira Issue Type Descriptions
- Jira Issue Type Counts by Status Categories (e.g., "to do", "in progress", "done")

These data points are processed to generate project specific fortune cookie-style messages ("prophecies") that are then displayed in your Jira environment.

Third-Party Services

To generate fortune cookie prophecies, the App requests the following services:

- <https://api.openai.com/v1/chat/completions> (operated by OpenAI)

The App sends HTTPS requests to these services solely to generate prophecy texts. No user-related or personal data is transmitted. Only the above mentioned Jira project metrics are transmitted.

Data Security

Since no personal data is collected or stored, there is no risk of personal data exposure. Communication with third-party services occurs over secure HTTP protocols.

User Rights

As no personal data is collected, stored, or processed by the App, there are no user rights to access, correct, delete, or restrict personal data under GDPR or CCPA.

Contact Information

For any questions regarding this Privacy Policy, please contact:

Andreas Zink
A2Z Software
Alpenblickstr. 2

Changes to This Policy

We may update this Privacy Policy from time to time. Any changes will be posted on this page with an updated effective date.

By using the App, you acknowledge that no personal data is collected, and only uncritical Jira project data is collected and processed by third-party services as described above.
