

# Fortune Cookies for Jira

1. [Introduction](#)
2. [Installation](#)
3. [Features](#)
4. [Usage](#)
5. [Additional Resources](#)

## Introduction

Add a spark of **inspiration and fun** to your Jira projects with the Fortune Cookie app! Harness **OpenAI** to generate **project-specific prophecies** based on lightweight, **non-sensitive metrics** (e.g. issue counts). Whether you're refining your backlog or managing your board, **open a fortune cookie** for a unique blend of motivation and insight.

**i** We do not store or process any sensitive project information! We only process the following data with OpenAPI chat completion:

- Project key
- Project type (e.g. 'software', 'business', ...)
- Issue type names (e.g. 'task', 'bug', 'story',...)
- Issue type descriptions
- Issue type counts by status categories (i.e. 'to do', 'in progress', and 'done')

## Installation

Visit [Atlassian Marketplace](#) or install directly from Confluence by searching for "Fortune Cookies for Jira".

## Features

- Generate project-specific prophecies
  - Based on non-sensitive project metrics
  - Using OpenAI

## Usage

- Open the Backlog or Board menu
- Select "Open fortune cookie" menu item
- A modal dialog opens with your project prophecy
- Click "Next" for a new prophecy
